It is our great pleasure to invite you to the 24th edition of our symposium. Planning a congress during the ongoing pandemic is challenging. The extent of associated restrictions on events, travel and accommodation are unpredictable for February 2022. It is our aim to hold an on-site congress that offers opportunities for face-to-face meetings with colleagues, business partners and friends old and new. However, our symposium will also be broadcast online for those who cannot attend the event in Düsseldorf. In the case of another lockdown, the symposium will only take place in a virtual format like last time. The program will then be slightly modified and we may also broadcast from other centers.

As with our previous meetings, experts from different parts of the world will take part so that we can learn from each other at an international level. A varied program of live demonstrations from the Evangelisches Krankenhaus Düsseldorf, mini- and satellite symposia, state-of-the-art lectures and breakout sessions provide an ideal professional environment for learning and exchange of knowledge and experiences. It is designed to encourage your active participation and stimulate discussion. The high number of participants and the very positive survey results from our previous symposia prove the concept successful. The faculty, the congress organization, LUX AV and our team are pleased to welcome you! We wish you an interesting and enjoyable stay in Düsseldorf or online presence wherever you are!
